ABOUT THE COMPANY

Seal Group has cultivated a long history of providing life support services, risk management and other essential support services, to international organisations and governments whilst they conduct their business in some of the most challenging environments.

Our network across the globe and specialism in these regions has meant our clients can drive their business forward without the added burden or negotiating a sometimes-perplexing area of operation. Seal Group has a mission to guarantee that we provide the correct services at the right time to maximise our clients' business potential.

In our chosen markets, our vision is to be the leader in client satisfaction, professionalism, superior quality and innovation. We are the architects of responsive and creative solutions to our clients' benefit. The team at Seal Group are committed to working partnerships with our clients that add value and consistently exceed expectations.

Seal Group has provided aviation solutions across the world since 2005 with a fleet of specially modified King Air aircraft, in addition to a global network of aircraft available for tasks in high risk environments. We also have the ability to provide aircraft charter, leasing and management solutions.

The company's aviation capability is supported by a highly proficient and qualified team of professionals with backgrounds in military and civilian aviation roles and experience operating in volatile and unregulated areas.

Seal Group complies with EASA and FAA maintenance regulations, which ensures that the highest standards are maintained regardless of the operating space.

Seal Group has a successful history in the management of a wide range of aircraft. Its services include all aspects of flight operational support from luxury private jets and commercial aircraft for large groups, to cargo aircraft involving simple or sometimes complex routes in underserved and remote regions.

The range of specialist aviation solutions that the company has worked on includes support to the governments of Australia and the United Kingdom for defence and national security projects as well as NGOs across the globe.

“ SEAL GROUP WERE ABLE TO ARRANGE AN EMERGENCY EVACUATION FOLLOWING AN INTERNAL CONFLICT. PART OF THEIR SOLUTION WAS TO PROCESS THE PASSENGERS ON BOARD THE AIRCRAFT AS OPPOSED TO WAITING ON THE TARMAC, HELPING TO REDUCE RISK AND SPEED UP THE EVACUATION.

A leading Oil and Gas Company

PRIVATE AIRCRAFT CHARTERS

Capable of arranging private aircraft for ad hoc leisure and VIP charters for regular business travel.

Seal Group can provide seamless, efficient and hassle free solutions for any type of scenario, with a global network that can encompass singular charters for executives or evacuations, or more extensive contracts including a series of flights.

The team comprises highly experienced individuals who have worked for leading names in the industry and have an extensive network across private charters including some of the most remote and volatile regions in the world.

Avoiding long queues at check-in, lengthy security checks, delayed flights and overnight stops are just some of the ways in which your time can be saved, when flying privately. The greater flexibility of on-demand charters means that, if your meeting runs over, we will keep the aircraft waiting for you. If your site visit finishes early, we will get you back home to your family sooner than expected.

Chartering an aircraft could also cost a lot less than you expect, when you take into consideration the time spent away from the office, expensive hotel bills and entertainment. With our extensive aviation experience, knowledge of local airports and a database of aircraft worldwide, you can rely on us to get you where you want to be at a cost-effective price.

Our global reach enables access to tens of thousands of aircraft worldwide – with the use of global procurement and local market knowledge, we are able to provide the a range of charter solutions across North America, South America, Europe, Africa, the Middle East and Asia.

The Beechcraft King Air 250, a cost efficient turboprop with the ability to carry up to eight passengers.

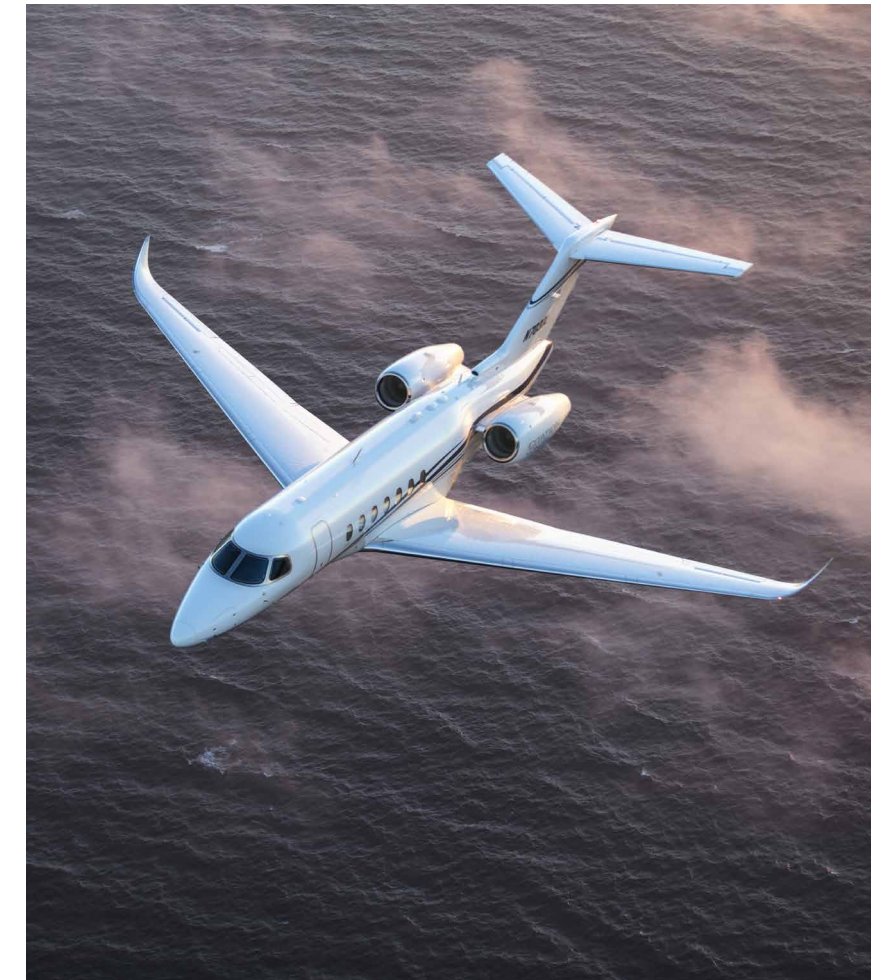

Travelling by private jet means you can have the peace of mind to continue to conduct business in private.

At Seal Group, we are committed to providing a level of personal service which exceeds the highest expectations, enabling passengers to travel in style, safety, superior comfort and considerable peace of mind. The most important aspect of our service is to deliver a bespoke experience tailored to our clients' exact requirements, learning precisely what they need to fulfil a private travel experience for the most discerning of passengers.

Each client is assigned a personal account manager, a single point of contact available 24/7, who make full assurances to understand exactly what that specific client's charter entails – from bespoke catering requirements, preferred aircraft and airports to chauffeur-driven transport or the most cost-effective solutions. Our global reach in the private aviation market is excellent, ensuring that we can cover almost every continent.

Seal Group has the ability to arrange charter solutions on over 130 private aircraft types, with access to over 50,000 individual aircraft globally. These range from helicopters and cost-effective piston and turboprop aircraft, to light jets (ideal for the time-conscious individual), heavy jets and executive airliners, with all of the luxury features for VIP clients. We have the ability to provide solutions for either ad hoc charters or a larger series of charter flights.

RANGE OF AIRCRAFT

HELICOPTERS

The range of helicopters and their flexibility allow passengers to fulfil any short-haul journey effectively. Helicopters have a full integration of speed, performance and manoeuvrability, as well as spacious cabins which often contain club seating, with exceptional comfort and visibility.

LIGHT JETS

Executive travel commonly fits within the two- to three-hour mark, making light jets one of the most regular categories of aircraft, offering an effective solution for any short-haul journey. Capable of carrying up to eight passengers, this range of aircraft is often popular for the more time-conscious passenger.

MID-SIZE JETS

Regarded as an efficient alternative to the larger heavy jets, these are capable of flying for up to six hours, some with intercontinental ranges. Mid-size jets also commonly feature full stand-up cabins, as well as ample luggage compartments, enclosed bathrooms, fold-out divans and tabled seating areas.

PISTON AIRCRAFT

Piston aircraft are ideal as low-cost air taxis, often to remote locations, using shorter runways, where other private jets are unable to land. They are best suited for short-haul charters, with small passenger loads, to areas with restricted or limited jet access.

TURBOPROPS

Turboprop aircraft, although not as cost-effective as their piston engine predecessors, offer a faster and more technologically advanced solution. Able to land at almost any airfield and perform flawlessly in all conditions, elegant interior touches make these light aircraft strong business and leisure solutions.

HEAVY JETS

Large spacious stand-up cabins, increased range, passenger and baggage capacities are some of the reasons why the heavy jet category is so sought after. Heavy jets connect continents with ease, with cruise speeds significantly higher than smaller, lighter jets, offering an experience to all passengers which is rarely rivalled.

EXECUTIVE AIRLINERS

Executive airliners can efficiently fly intercontinental routes with unbeatable comfort. They are well and truly in a class of their own, catering for the most eminent of clients. The robust characteristics of these commercially inspired aircraft are an excellent value proposition, when outfitted for the private market.

GROUP CHARTERS

*An experienced team
who have managed
group charters for a
huge range of clients
including national
governments.*

Seal Group has the ability to provide commercial aircraft for those travelling in larger groups. Commercial aircraft offer larger seating capacities and we can create bespoke schedules for those that require alternative or more extensive solutions to smaller aircraft.

We work with national governments, leading oil & gas and automotive companies, sports teams, construction and mining companies, travel operators, event organisers and private individuals to provide bespoke solutions for ad hoc flights or more extensive programmes.

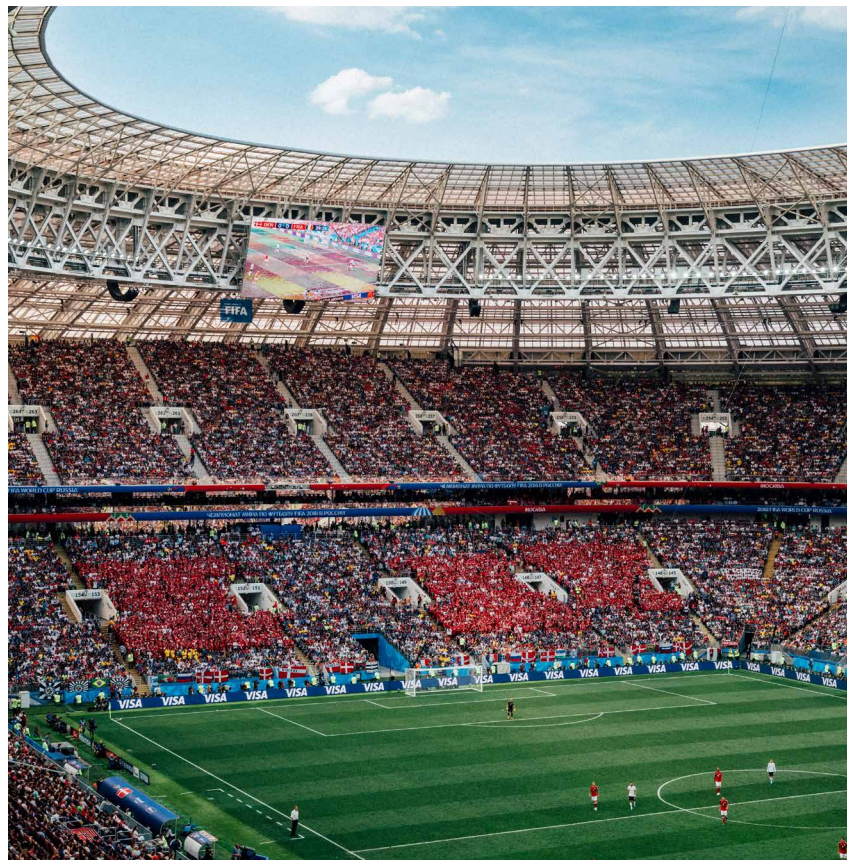

Whether an ad hoc charter or a more extensive charter contract including a series of flights, we can provide cost-effective solutions to transport personnel to areas under-served by schedule services, no matter how complex or remote.

We have an extensive track record providing crew rotations or specialist workers for industries including construction, oil and gas, automotive and mining, offering our clients the peace of mind that each intricate detail on every flight is taken care of with the greatest of detail.

We also assist a range of governmental departments and NGOs, again moving personnel but also with evacuation and repatriation flights to coordinate the movement of sometimes thousands of passengers in some of the most complex environments across the world.

Seal Group has worked with an array of different clients across the world for a huge variety of events including product launches, music and sporting events, conferences, incentive programmes, weddings and even private group charters for high net worth individuals.

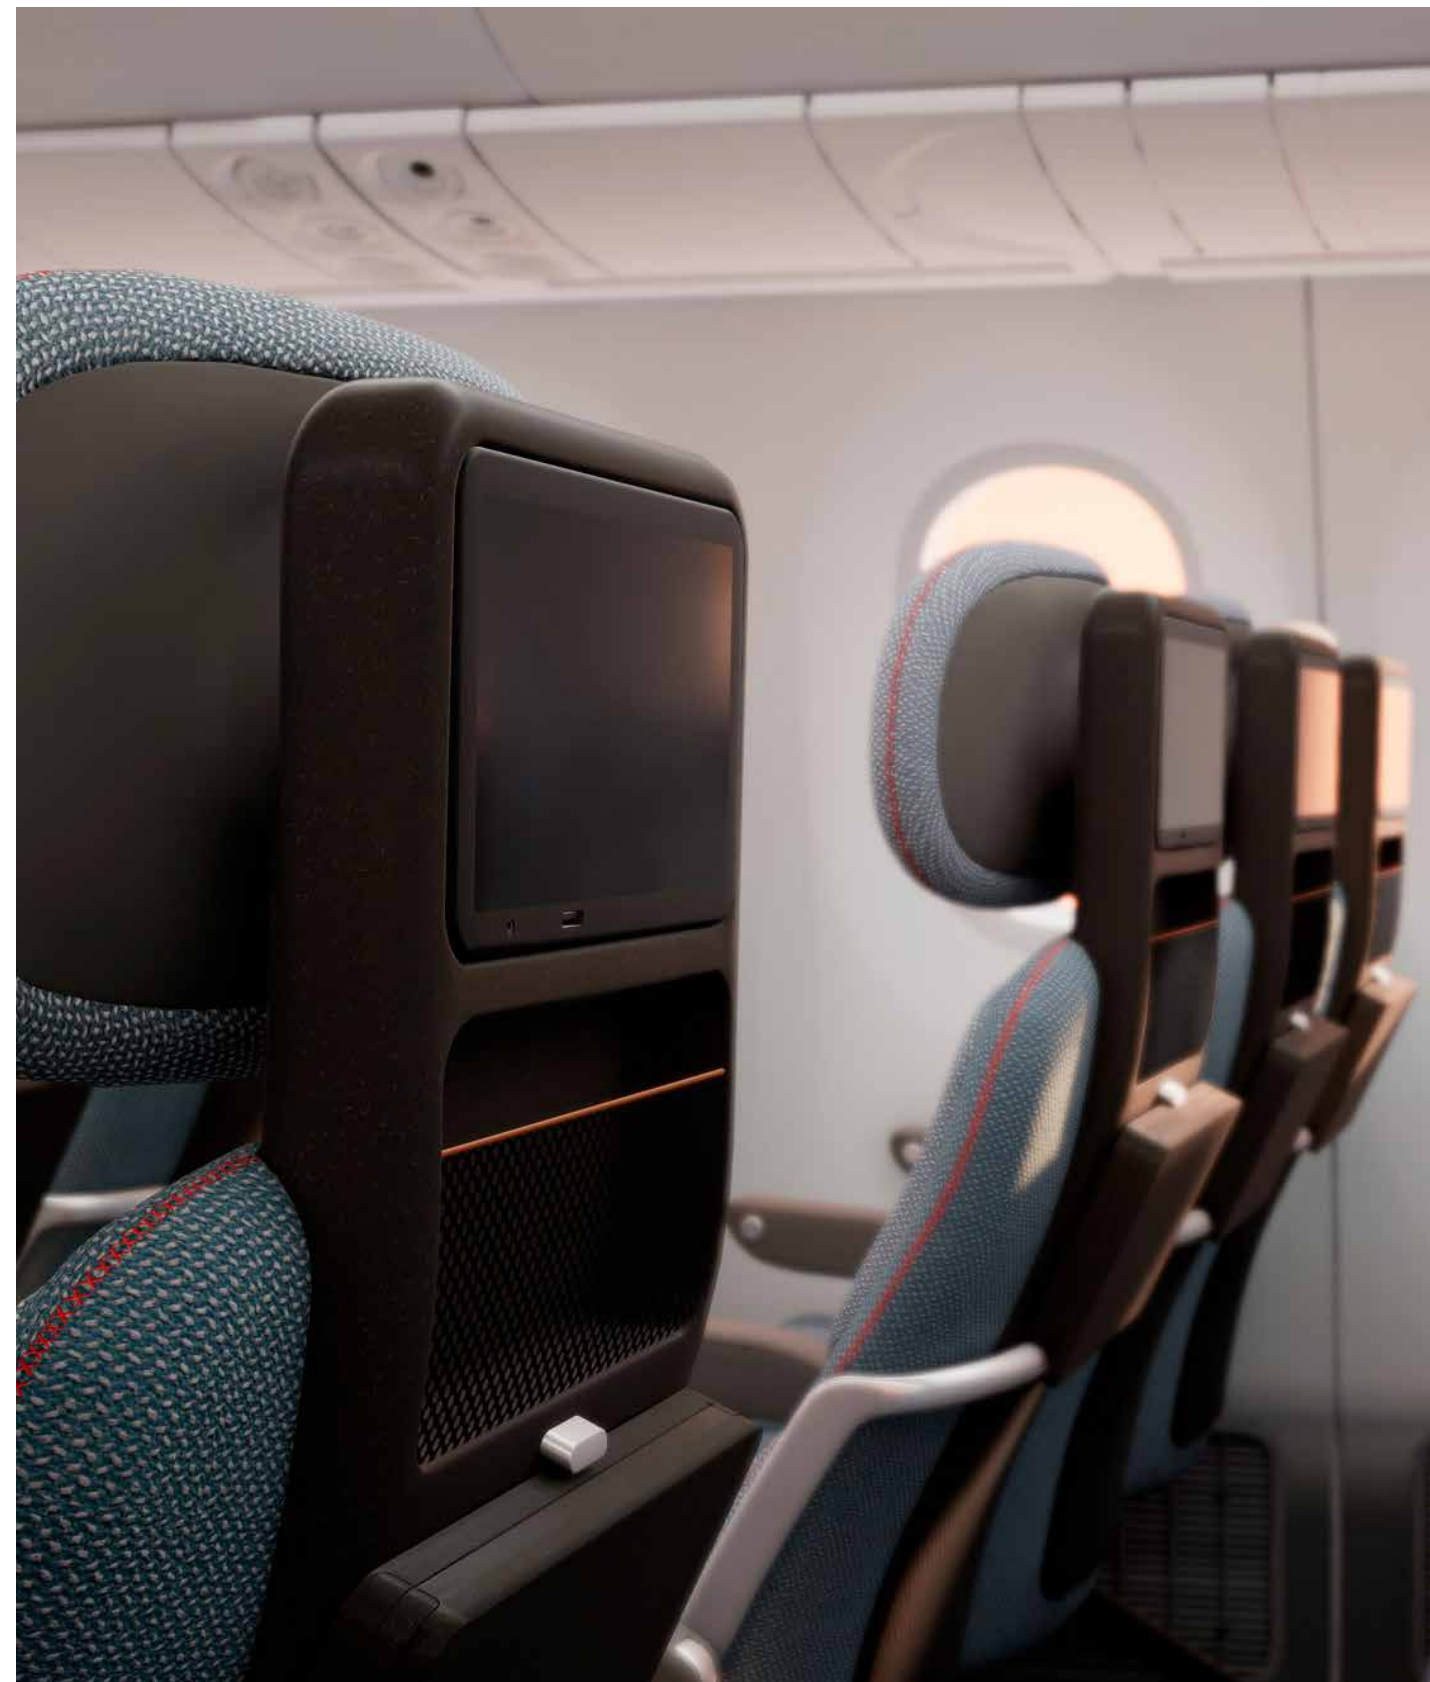

Our network covers a variety of global regions, including Europe, the Middle East, the Americas, Asia and Africa. No matter the complexity of the requirements, be it a remote location or an extensive program of flights, Seal Group has the capability to deliver suitable and cost-effective group charter solutions.

Our group charter team has the ability to assist event-organisers to ensure each charter, or series of charters, is a unique experience, with a full range of customisation options available such as branding opportunities at the airport, outside or on board the aircraft. The range of branding and personalisation opportunities can include, but not be limited to:

- Aircraft headrest covers
- Personalised menu cards and napkins
- Toiletries and goodie bags
- Personalised aircraft livery
- Enhanced in-flight entertainment
- Branded flight crew uniforms
- Branded check-in desks
- Branded boarding passes and ticket wallets
- Bespoke catering
- Dedicated security lines and private lounges
- Meet and greet service

COMMERCIAL AIRCRAFT TYPES

EXECUTIVE AIRLINERS

The pinnacle of group charter travel, executive airliners configured for commercial charter use feature more comfortable and luxurious surroundings, including bespoke configurations, larger leg room, feature bathrooms and even bedroom or conference rooms.

REGIONAL TURBOPROPS

The most cost effective way to organise group travel, regional turboprops can also be more flexible in the solutions they cater for. Ideal for transport on short to medium haul trips, certain aircraft are optimised for operating on rough landing strips and unprepared airports in remote locations.

REGIONAL JETS

More versatile than their narrow body counterparts, regional jets have smaller capacities but provide excellent travel options for short-haul journeys of 1-3 hours. Regional jets commonly cater for up to 120 passengers, and offer a more cost-effective solutions than narrow-body aircraft.

NARROW BODY AIRLINERS

Highly versatile and flexible with their use, narrow body aircraft have a cabin diameter of between three or four metres. This allows for up to 6-abreast seating, with some in a 2-abreast format to maximise space and legroom. The highest seating capacity is up to 295 passengers on the Boeing 757-300.

WIDE BODY AIRLINERS

Offering the largest seating capacities of any type of commercial aircraft, wide-body airliners also have intercontinental ranges with the ability to cover up to 11,000 miles. Seating capacities range from 250 to 650 passengers, and are the only viable option for long haul travel.

CARGO AIRCRAFT CHARTERS

An experienced cargo team that have the capability to offer the most effective solutions no matter the size or shape of your cargo.

Seal Group has a highly experienced team of cargo aircraft chartering professionals who have managed hundreds of charter contracts from urgent 'go now' operations in remote and hostile locations, to heavy and outside cargo.

The team can provide a complete range of cargo aircraft, including light jets for urgent packages, smaller aircraft capable of landing on underdeveloped runways or large freighters with the ability to deliver outside cargo.

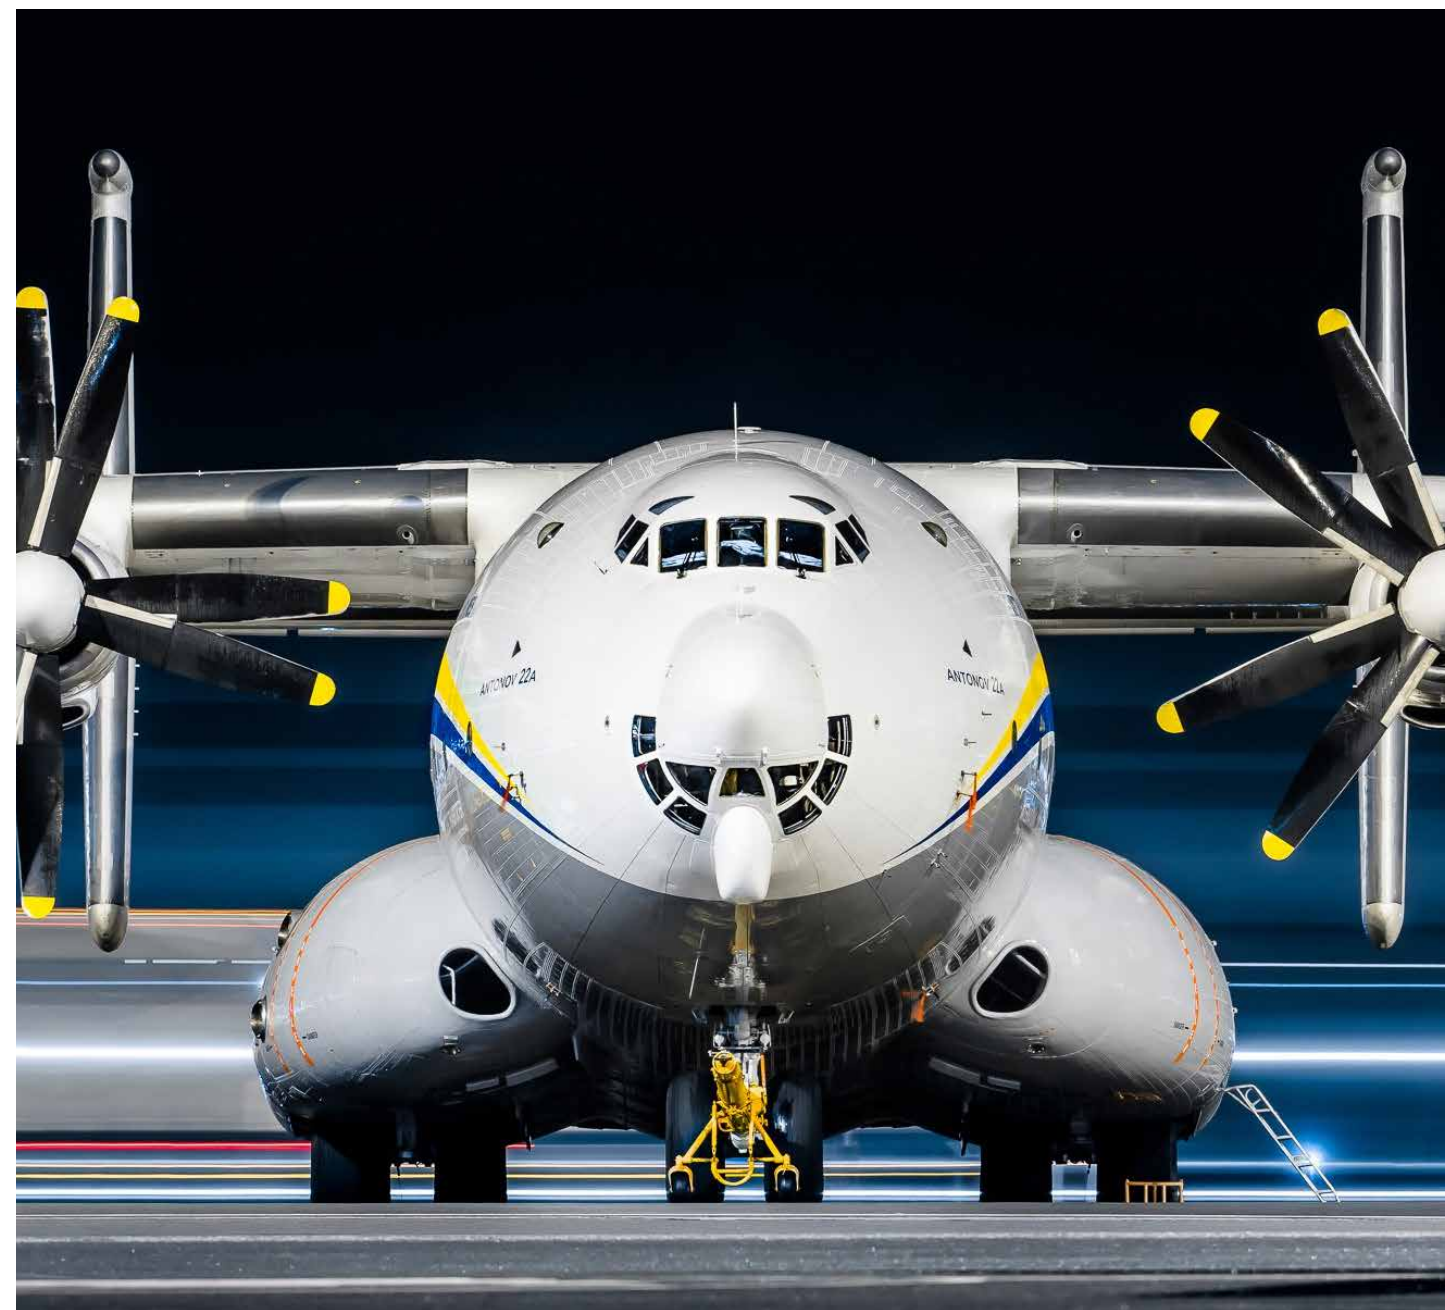

The B747-400F has the ability to take payloads exceeding 100 tonnes with a flight range of 13 hours

One of the largest aircraft in the world, the AN-124 is specifically designed for carrying heavy or outsize loads

Seal Group's personnel has cultivated a huge amount of technical expertise vital to understanding the complexities involved with any cargo charter, anywhere in the world. Each one of our cargo charter specialists has undergone intensive training at the world's leading brokerage firms, and spent significant time on the tarmac so that they understand exactly what it takes to manage a charter flight from start to finish.

Seal Group has the ability to arrange charters on small aircraft for urgent 'go now' flights to specialist aircraft for underdeveloped runways in remote or hostile locations, as well as source the world's largest aircraft, the Antonov AN-225 for oversized cargo. The company has the capability to source cargo aircraft with payload limits up to 250,000 kgs (551,156 lbs), and has delivered hundreds of charters worldwide in often hostile and complex locations.

TYPES OF CHARTER

URGENT 'GO NOW'

Seal Group has the ability to source an aircraft with very short notice, at any time of the day. Using local market knowledge and a global procurement capability an aircraft can be in the air within hours of an initial request. We commonly work with leading oil and gas, automotive, and pharmaceutical companies.

ON BOARD COURIER

Seal Group provides a supervised delivery service of sensitive, valuable or time-critical consignments in a quick, secure and traceable manner. Whether it's the hand-delivery of personal belongings or vital manufacturing parts, our team provides an efficient and reliable means of transportation

DANGEROUS GOODS

All of Seal Group's cargo specialists have extensive experience in transporting dangerous goods, ensuring the safe transit of hazardous freight. We have worked with governments, the military and large corporations the world over to arrange charters to carry dangerous goods.

HEAVY & OUTSIZE

Certain cargo simply won't fit into scheduled service aircraft. Seal Group is able to source specialist aircraft to transport especially large or heavy cargo, utilising experience and knowledge to ensure the safe and seamless transit of outsize freight.

AOG

Seal Group has the experience to arrange ad hoc cargo charters to transport urgently needed parts for aircraft grounded due to technical difficulties. We have worked closely with some of the world's leading airlines to offer efficient solutions globally.

HUMANATARIAN AID

The company has significant experience chartering aircraft to get aid to those who need it most. In the wake of natural and man-made disasters, our team is able to use their experience and knowledge to ensure help and aid reaches those who need it most, as quickly as possible.

REMOTE & HOSTILE LOCATIONS

Transporting equipment and supplies to remote and hostile areas can be complex. From the remotest regions of Africa to troubled Afghanistan, Seal Group can ensure cargo is safely and securely in and out of some of the world's most isolated and unstable environments.

SPECIALIST SERVICES

Unlike many aviation companies, Seal Group has the skill set to offer a variety of specialist services to suit more niche requirements.

Be it a life saving medical evacuation on a specially configured aircraft, an emergency evacuation in a hostile environment or the management of complex travel in a volatile region of the world, Seal Group has the know-how and track record to deliver viable solutions.

Being CAMO approved, the company also has a detailed background in the management and maintenance of aircraft, and furthermore is able to provide ACMI solutions, including the procurement of Intelligence, Surveillance and Reconnaissance aircraft for specific missions.

MEDICAL EVACUATION

PAGE 38

Seal Group works with a European based operator of Air Ambulances in Malta, including three B200 Beechcraft Super King Airs and a Learjet 35. Each aircraft is fitted with a full ICU (intensive care unit) capacity and has the ability to allow patients to lie flat or fly at a designated air pressure level.

The teams experience enables us to provide a full medical crew, and allow coverage across a vast region of Africa, as well as parts of the Middle East and southern Europe. Furthermore, our experience in wing to wing operations means we can service the Americas, Asia or even further a field, if required.

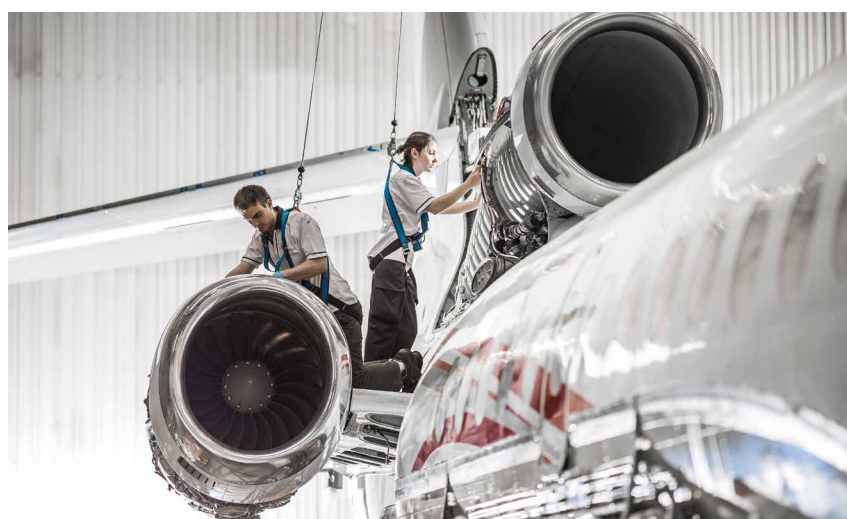

A dedicated operations team has live tracking alert systems, and can provide full planning and transport management, along with the added know-how to deal with specialist insurance and financials during an operation.

PAGE 39

AIRCRAFT MAINTENANCE

PAGE 40

Seal Group has a successful history in the management of a wide range of aircraft worldwide, ranging from luxury private jets and commercial aircraft, to complex cargo aircraft.

The company complies with EASA and FAA maintenance regulations which ensures the highest standards are upheld regardless of the operating space. The company is CAMO-approved, a requirement for all EU-registered aircraft which ensures the highest levels of technical representation for aircraft maintenance.

PAGE 41

| ACMI

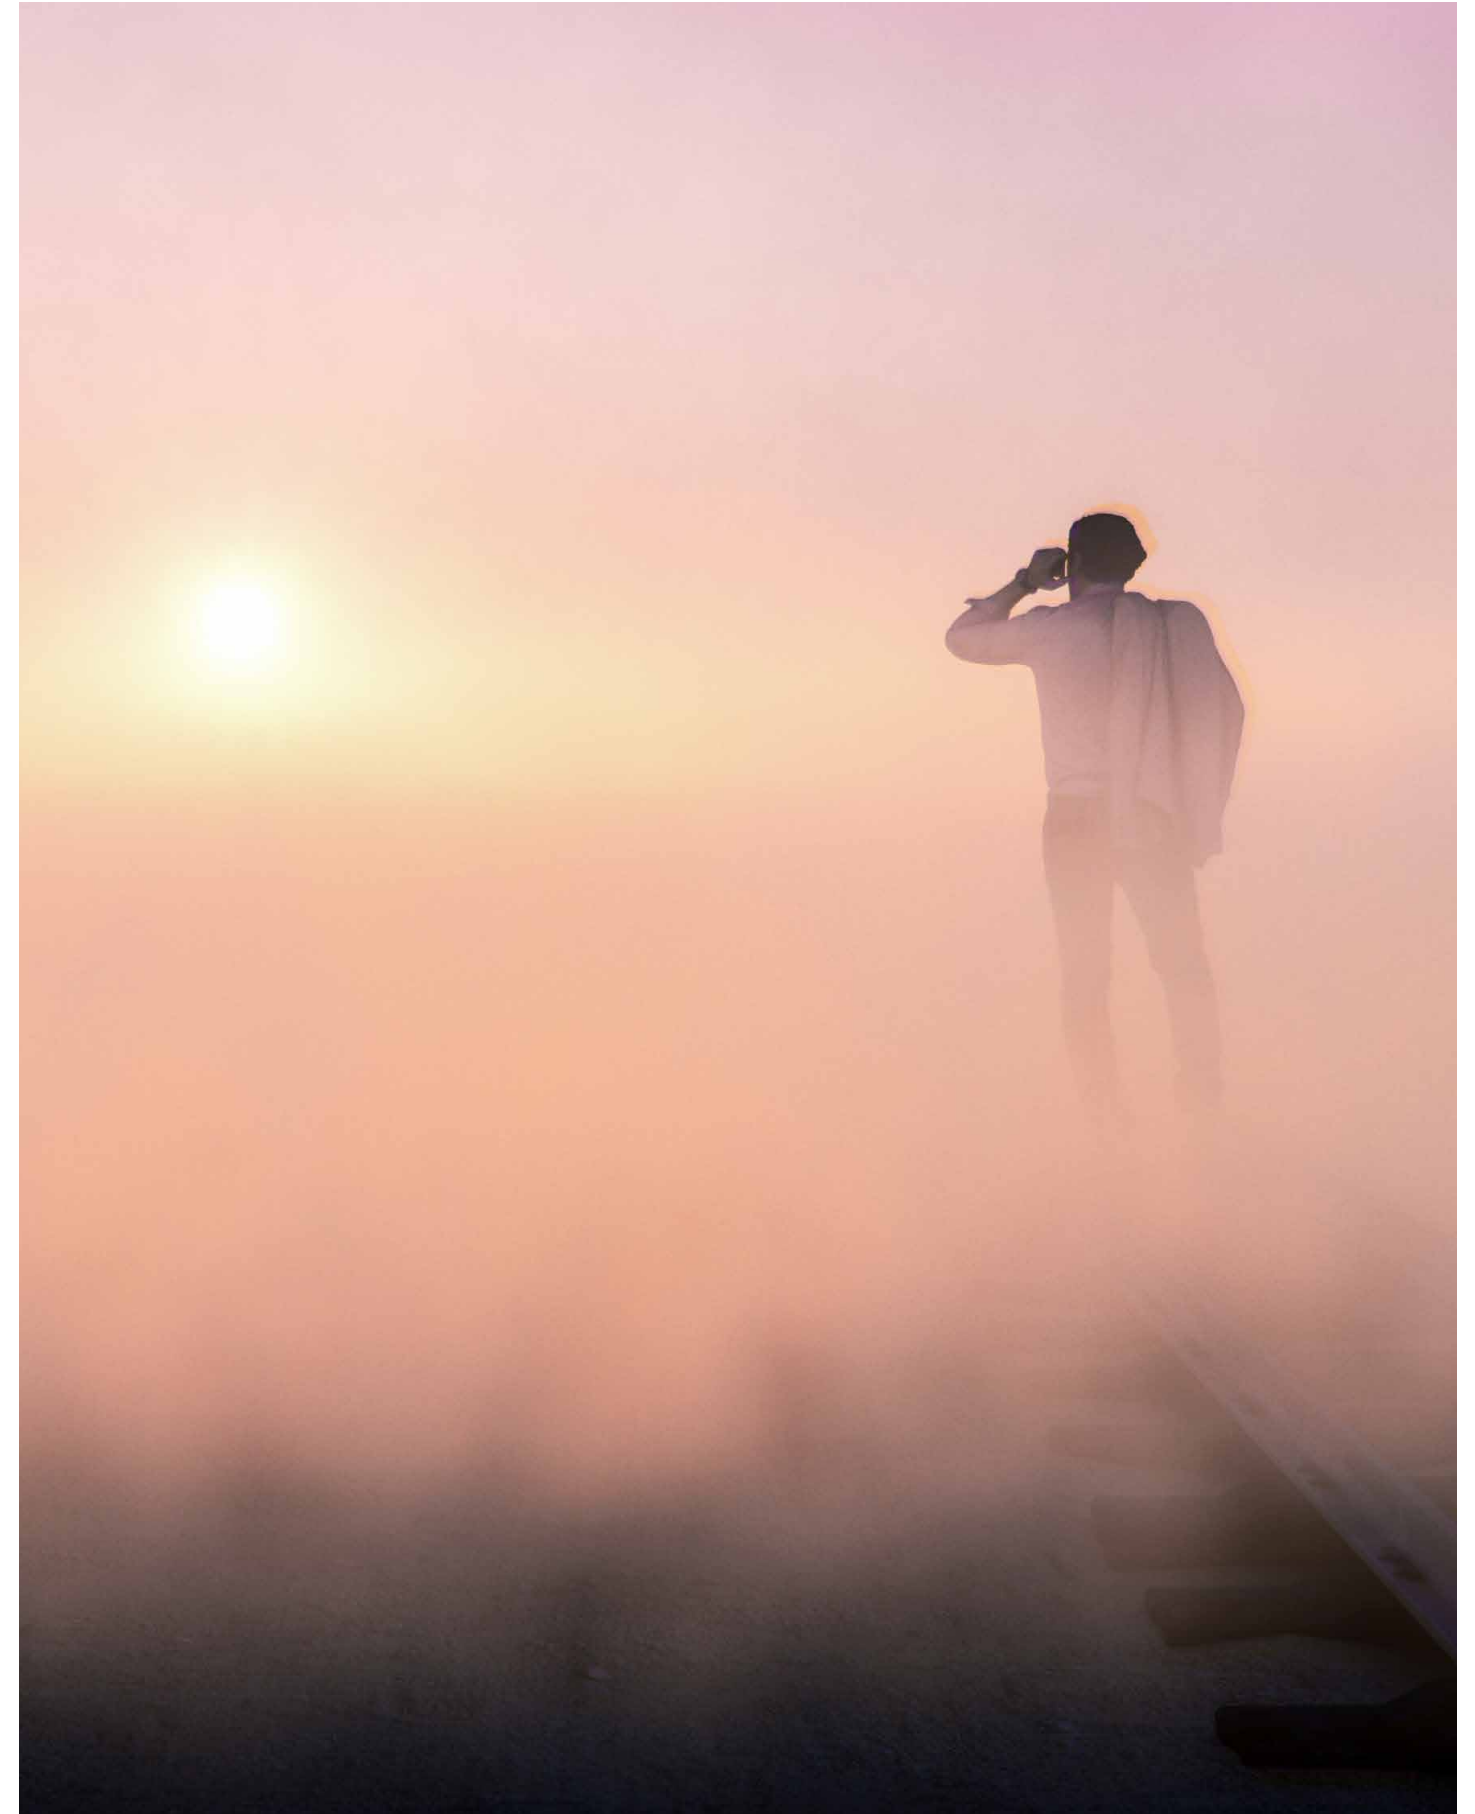

Standing for Aircraft, Crew, Maintenance and Insurance, ACMI is an aircraft leasing arrangement exclusively between two airlines or aircraft operators. One body (the lessor) provides an aircraft, crew, maintenance, and insurance (ACMI) to another body (the lessee), which then pays for the hours operated. Leases that last between 1-12 months are generally called 'wet leases' whilst those over a year are 'dry leases'.

Seal Group is also a professional leasing expert, specialising in the provision of wet lease (ACMI) and dry lease operations in the Middle East, Europe, Americas, Africa, Asia and Asia Pacific.

The company has an extensive network and close-knit relationships with some of the world's leading airlines and operators, enabling it to offer ACMI solutions that provide immediate and effective answers for short or longer term travel needs.

EMERGENCY RESPONSE

Seal Group has a team dedicated to supporting emergency evacuation from any global location. Our network is strategically placed to support our clients' needs in their time frame and our specialist intelligence team is on hand to create a full planning appraisal prior to entry and tailor plans suitable to the area of operation.

A 24/7 call centre offers support to staff members on the ground and management at hub locations provides real time reports and updates as well as live tracking. Dedicated onsite personnel can also be provided during an evacuation with a secure satellite communication uplink.

Dedicated safe zones across the network can also be utilised to ensure the safety of personnel as well as availability to deploy security personnel. The company has access to a range of global assets to support air evacuation and furthermore has widespread experience dealing with insurance to ensure fast reaction and execution times.

SPECIALIST ISR

Seal Group offers Intelligence, Surveillance and Reconnaissance (ISR) tasks and Special Mission aircraft for lease as a total solution.

The team has actively supported government defence operations and other agencies in conflict and post conflict environments. Utilising special mission systems that incorporate the latest generation technology.

Seal Group can rapidly deploy to and operate from any location worldwide with the ability to deliver

bespoke solutions in support of any operation. The company's solutions include:

- Bespoke and flexible platforms
- Military and civilian capability
- Airborne data acquisition to meet specific military objectives
- Maintenance and personnel support
- Full mission reporting
- Rapid response 'hardened aircraft suitable for high-risk environments

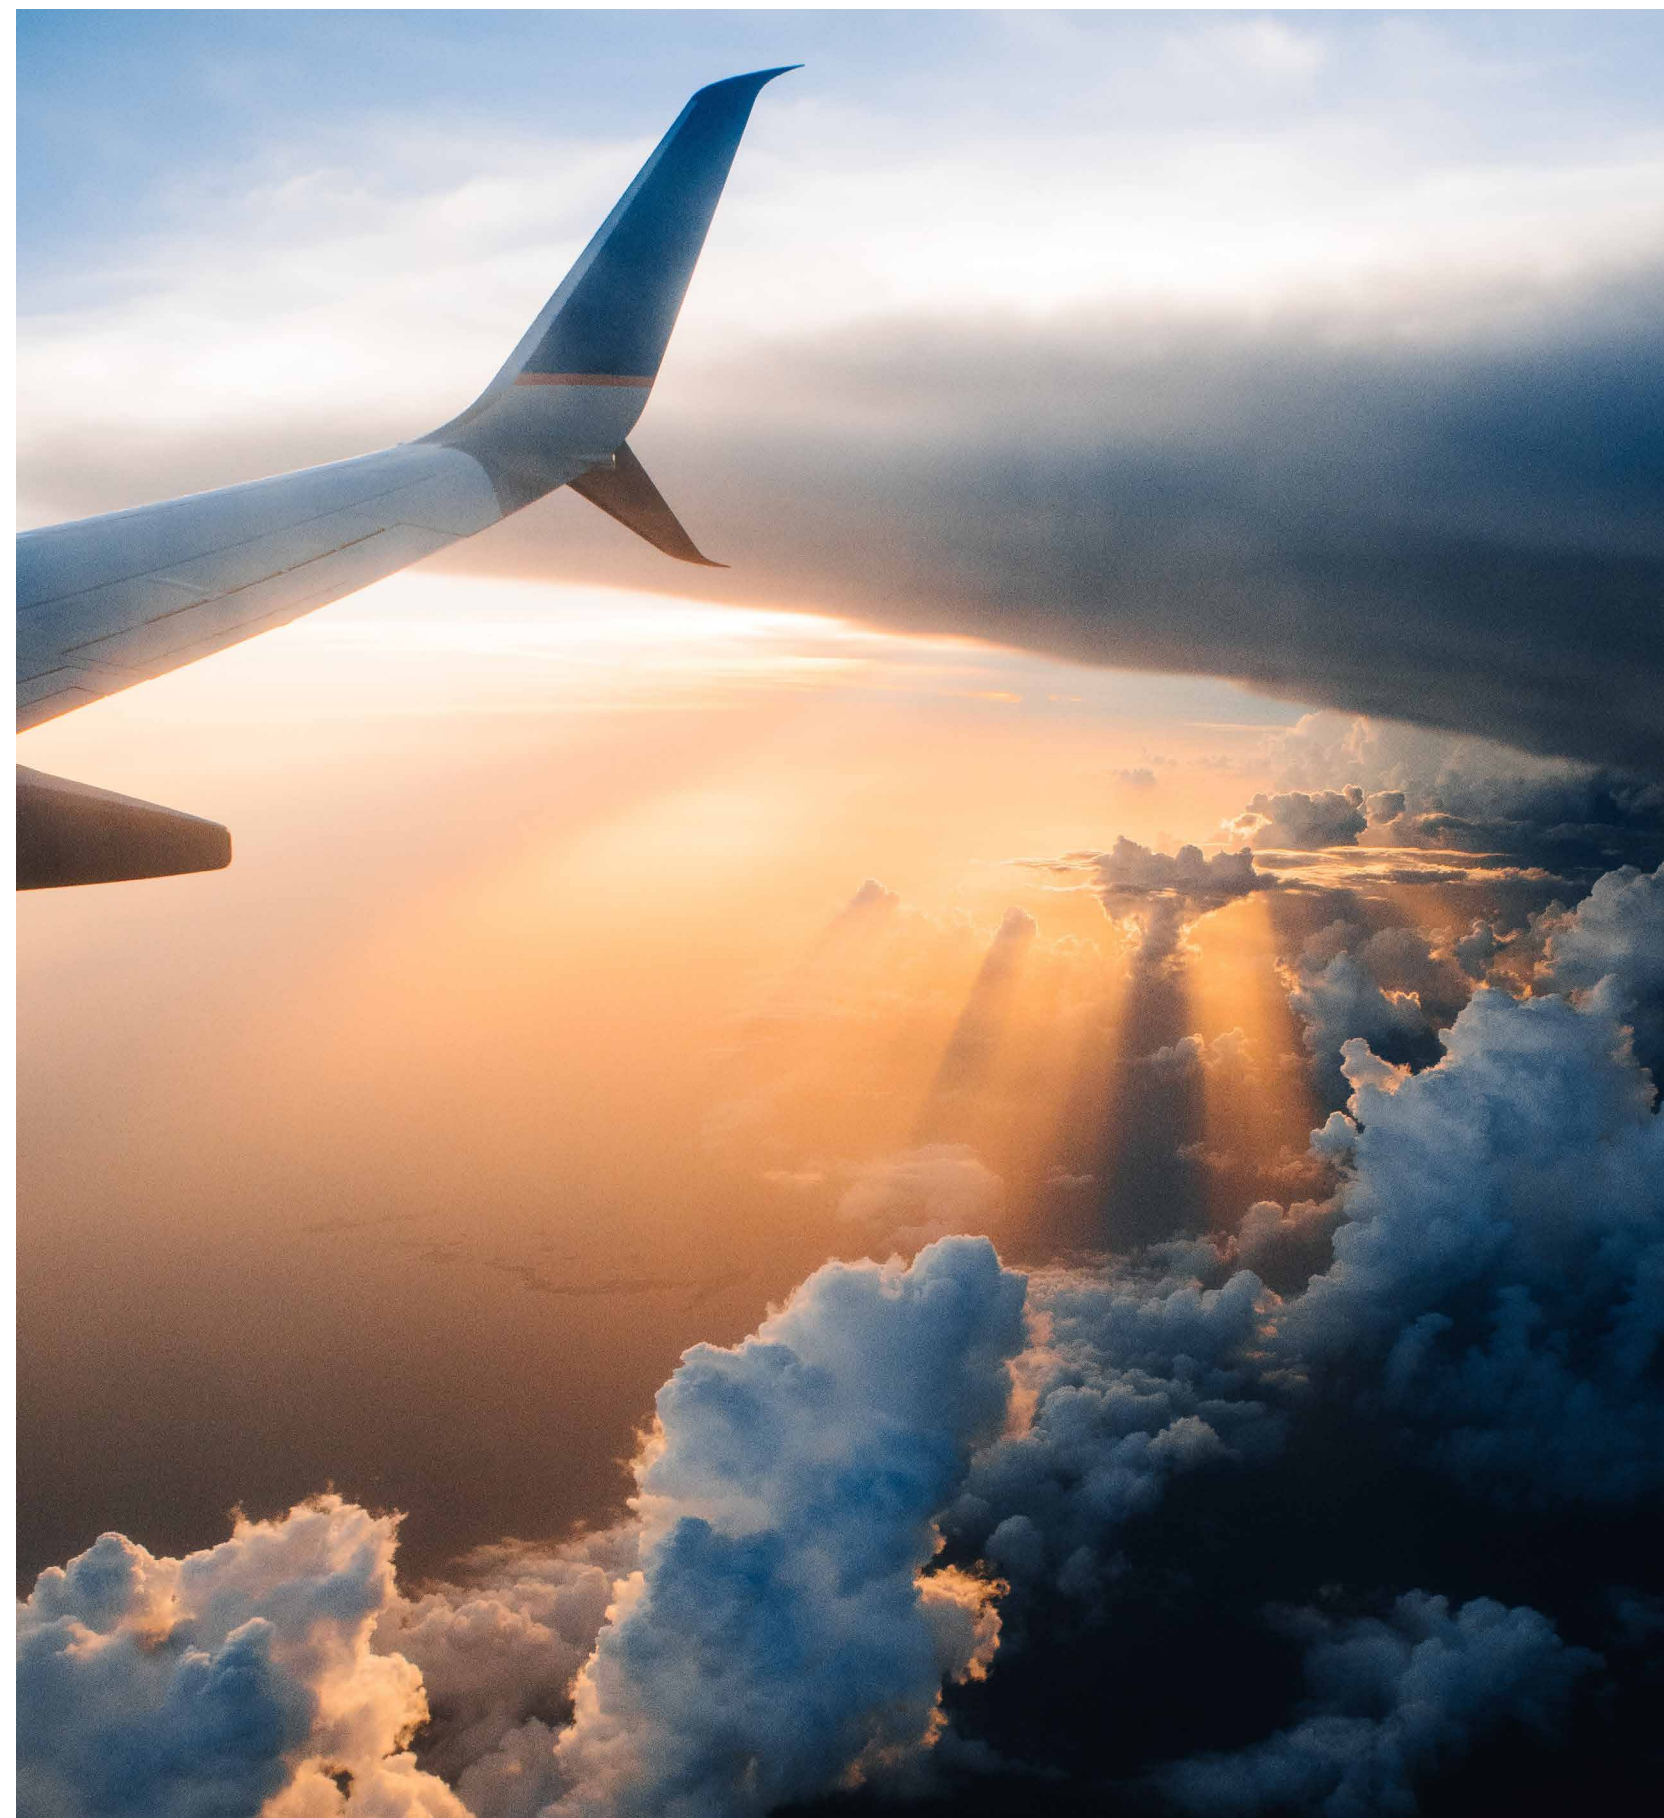

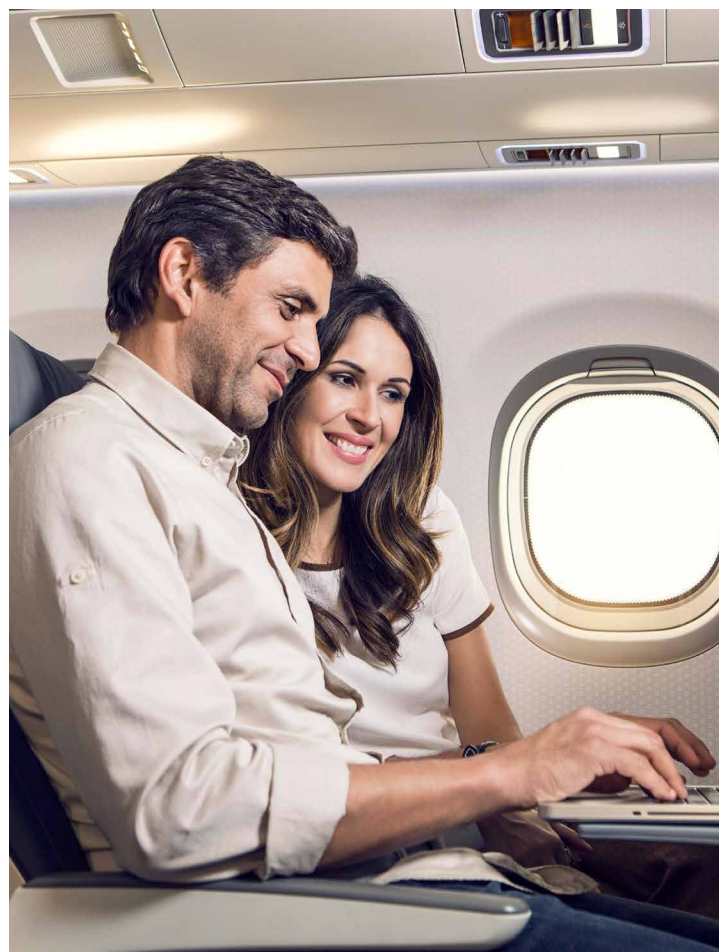

TRAVEL COORDINATION AND VISAS

Seal Group has a team of dedicated staff to handle transfers from country to country, with the experience and know-how to advise extensively on any requirements, no matter how complex.

The company offers a booking service with 24/7 access for charter and ad hoc travel movements as well as a detailed flight watch service which can provide regular updates to all our clients.

Visas can not only be obtained globally, but the process can be explained in thorough detail, while also providing a risk analysis of the areas of travel and a detailed explanation prior to travel confirmation.

Seal Group also offers a GPS service and 24/7 monitoring in more complex regions with constant updates on potential situations that could effect the clients travel.
